

AutoHub Service Acquisitions automatically targets every eligible customer who visits your service department with a purchase offer based on your custom pricing criteria.

Automatic Data Pull Integration

AutoHub integrates with your DMS and automatically pulls each repair order as soon as it is created.

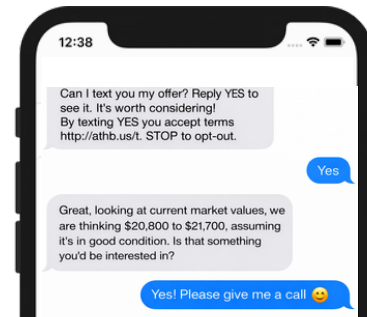

SMS Outreach to Customers in Service Drive

AutoHub analyzes vehicle and customer information and sends a text informing eligible customer of high demand for their vehicle - all while the vehicle is in service drive.

Instant Valuation and Offer

After customer opts-in, offer is sent via text and can be an estimated range or fixed value based on your valuation and custom pricing criteria.

-  Automated customer outreach based on dealer-defined acquisition criteria
-  Real-time conversations with your customers via text while your customers are on-site and their vehicles are serviced
-  Each lead includes a full appraisal generated with the AutoHub Acquisition Engine (AAE), based on your pricing rules
-  AI Copilot can automatically respond in certain scenarios to drive the conversation and successfully negotiate offer acceptance

-  On average, dealers acquired **23% more vehicles** with Autohub
-  **20% opt-in rate** for text offer to service customer
-  **12 vehicles** purchased per month on average
